GTMS

GTMS   **Gühring Tool Management Software**

Basic module

Your entry to digital tool management

Your vision – our software

Your path to digitalisation

To digitise your entire production process, you need just one piece of software: Gühring Tool Management Software (GTMS). From automatic tool ordering through to analysing tool data, GTMS covers a company's most common requirements.

And through all of this, it always follows one goal:

Minimising your administrative workload and ensuring that everything you need is available in the right quantity, at the right place, and at the right time. And thanks to different modules, the software can be individually tailored to your needs and applications.

basic requirement for digital, paperless manufacturing

controlled withdrawal & automatic follow-up orders

avoidance of unused stock

clear allocation of tool costs

Everything under control?

Do you always have an overview of tool consumption and stock levels in your company? Controlled, digital warehouse management and permanent consumption checks are a prerequisite for all assets within your company are distributed in a targeted manner. Failure to meet these criteria will result in the build-up of unused stocks and, in the worst case, production downtimes due to missing production-relevant articles.

How GTMS can help you to digitalise your manufacturing:

master data maintenance
for users, user groups, suppliers, articles

—

cost allocations
during booking processes for greater transparency

—

management of access rights
for individual employees

—

evaluations, analyses and reporting
to optimise production

—

warehouse management
with a wide range of booking options

—

tool planning
for automatic reordering of stocks

—

separate management
for new and reground articles

Full control of tool management: Our tool dispensing systems

When it comes to tool management, we offer hardware and software, all from a single source: As such, Gühring dispensing systems are equipped with GTMS Basic as standard and offer simple solutions for managing tools, operating resources and many other items in production.

One example is the new TM Minibox, which expands our cabinet portfolio and now makes tool management even more flexible. With the compact box, you always have the right tool to hand wherever you need it. And the pre-installed Basic GTMS package digitalises fundamental processes in your manufacturing.
